Metalubs X D - Fuel treatment

Domain: A high-tech fuel treatment developed for diesel operated engines.

Dosage:

Pour 40 ml of **Metalubs XD** per 40 liter diesel fuel into the tank in the first 200 liters, directly before refueling. Then regularly add 20 ml of Metalubs XD to each 40 liter of diesel.

Appearance

Physical State:	liquid
Color:	brownish
Odor:	characteristic

Safety-related data

Flashpoint:	72°C	Hazard class A III
Ignition temperature:		cca. 190°C (for oil distillate)
Vapor pressure at 20°C:	< 0.1	mbar
Density at 20 °C:	0.98	g/cm ³
Boiling point/boiling range:	from 150°C	
Water solubility:	insoluble at 20°C	
pH-value:	7 to 9	
Kinematic viscosity at 40°C:	12	mm ² /s
Flammability (solid, gaseous):	Not flammable	
Oxidizing properties:	Not oxidizing	
Auto-ignition temperature:	Not self-igniting	
Melting point/melting rage:	Not specified	
Solubility in other solvents:	Well soluble in most oils	

The products are made in Germany for Metalubs LTD, who is responsible and offers warranty for the distributed products.
