## Metalubs X P - Fuel sistem treatment

**Domain:** It is a high-tech fuel treatment developed for petrol operated engines.

**Dosage:**

40 ml per 40 litre must be poured into the tank in the first 200 litre of petrol, directly before refueling. Then regularly add 20 ml to each 40 litre of petrol.

**Appearance:**

|                 |                |
|-----------------|----------------|
| Physical State: | liquid         |
| Color:          | brownish       |
| Odor:           | characteristic |

**Safety-related data:**

|                                |                           |                                 |
|--------------------------------|---------------------------|---------------------------------|
| Flashpoint:                    | 69°C                      | Hazard class A III              |
| Ignition temperature:          |                           | cca. 210°C (for oil distillate) |
| Vapor pressure at 20°C:        | < 0.1                     | mbar                            |
| Density at 15°C:               | 0.96                      | g/cm <sup>3</sup>               |
| Boiling point/boiling range:   | from 150°C                |                                 |
| Water solubility:              | insoluble at 20°C         |                                 |
| pH-value:                      | 7 to 9                    |                                 |
| Kinematic viscosity at 20°C    | 11                        | mm <sup>2</sup> /s              |
| Flammability (solid, gaseous): | Not flammable             |                                 |
| Oxidizing properties:          | Not oxidizing             |                                 |
| Auto-ignition temperature:     | Not self-igniting         |                                 |
| Melting point/melting rage:    | Not specified             |                                 |
| Solubility in other solvents:  | Well soluble in most oils |                                 |

The products are made in Germany for Metalubs LTD, who is responsible and offers warranty for the distributed products.
