Metalubs X T - Transmission treatment

Domain: Metalubs X T is a high-tech transmission treatment to increase lifetime of manual transmissions, differential gears and industrial gears.

Dosage:

It does not require skill or tools, simply add it to the fresh lubricating oil in a ratio of 5 to 10%. It is recommended to be used in case of all oil changes. The mixing ratio is 5% for post treatment.

Appearance

Physical State:	liquid
Color:	white/yellowish
Odor:	characteristic

Safety-related data

Flashpoint:	215°C
Ignition temperature:	245°C
Vapor pressure at 20°C:	< 0.1 mbar
Density at 20°C :	0.98g/cm ³
Water solubility:	insoluble at 20°C
pH-value:	7 to 9
Kinematic viscosity at 40°C:	85 mm ² /s
Flammability (solid, gaseous):	Not flammable
Oxidizing properties:	Not oxidizing
Auto-ignition temperature:	Not self-igniting
Melting point/melting rage:	< -5°C
Solubility in other solvents:	Well soluble in most oils

The products are made in Germany for Metalubs LTD, who is responsible and offers warranty for the distributed products.
